WHO ARE WE?

Periculum safety consultancy is a risk management company which pride itself in providing cost effective, industry proven sustainable safety solutions.

OUR AIM

Our aim is to provide practical safety solutions which are easily implementable, easily-sustainable, time effective and easily manageable. These systems are in line with all local legislation, your client specifications and can be catered to meet international standards.

We see human capital as a company's biggest resource, which can also be a company's greatest risk. With limited training, our systems will reduce the hazards in your workplace and minimize the risk of injuries.

By implementing our systems, you will manage your biggest risk in such a way that your company will feel safe taking on bigger risks.

OUR VISION

Periculum's vision is to level the playing field for small and medium enterprises in terms of Health and Safety. We aim to supply cost effective safety solutions to companies that do not have the same means and resources as a larger company.

We want to reduce the red tape in the industry by granting smaller companies the same opportunities larger companies have by managing their safety at the same level of professionalism large companies affords. Our systems is designed not to break your budget, giving you piece of mind that can comply with the legal aspects without sacrificing on quality and production.

SERVICES WE RENDER

Periculum offers achievable health and safety in a practicable manner in obtaining best value for all our clients' needs. We provide different categories of services to cover the full spectrum of HSE (Health safety and environment), which includes:

CONSTRUCTION PERMITS

We can assist clients with the application off construction work permits, as well as drafting the safety specifications for the project. We can also manage the contractors appointed by the client to ensure the client complies with his legal responsibilities.

CONSTRUCTION SAFETY

Complying with the ever-changing construction rules and regulations has become a daunting task, and smaller contractors normally feels exploited by systems not catered for. Periculum safety has in depth experience in construction, and knows the challenges smaller contractors faces when taking on projects.

Our staff of safety professionals are educated, knowledgeable and have years of construction field experience to assist and support your business.

CONSTRUCTION SITE SAFETY

Periculum has highly qualified Safety specialists and Safety Representatives available to assist on any type of construction site . Our systems is industry tried and tested, and our expertise will deal with any safety challenge you can expect on projects. Our safety specialists are SACPCMP registered and have a thorough understanding of all relevant legislation, providing our clients with piece of mind that your company is in good hands.

Periculum can meet the many demands of large field projects by supplying the onsite project safety expertise your company needs.

Key Benefits of Hiring Project Safety Consulting Professionals:

- Dedicated expertise managing your risk
- Additional management depth
- Flexibility to address safety on any shift
- Firm based expertise for each project

SAFETY SYSTEMS

We provide customised safety systems which will cater to your company's needs. We recognise the fact that your company is unique, and an off the shelf safety system will not work. Therefore, none of our safety systems will be the same.

OHSAS 18001, ISO 9001 AND ISO 14001 MANAGEMENT SYSTEMS

Periculum safety consultancy will help you develop the ISO 45001(OHSAS 18001), ISO 9001 or the ISO 14001 SHEQ Management System. We have the expertise in the successful implementation and certification of these systems, and maintaining your accreditation for the years to come. With accredited systems, your company will gain international recognition and prove that your products and services are of the highest quality.

Our safety Specialists will assist you in the following:

- Developing the standards and documentation required for the ISO 45001(OHSAS 18001), ISO 9001 and ISO 14001 Management Systems.
- Implementation of the safety management systems and making sure the systems are working for your organisation.
- Performance of a gap analysis audit on your current running systems, preparing your organisation for a successful certification audit.

- Coaching and training of all key role players who have the responsibility to implement the ISO 45001(OHSAS 18001), ISO 9001 and ISO 14001 Management Systems within your organisation.
- Leading and facilitating the entire certification process , ensuring your company achieve certification.

SAFETY FILES

Our safety files are customised to suit your client's exact specifications. We take pride by stating that our service to you doesn't stop when you receive the safety file. We will make sure that your safety file is approved by your client, and that you are able to start work. Furthermore, we will ensure that you understand the contents of the safety file to manage the system.

RISK ASSESSMENTS

Periculum can conduct professional Risk Assessments which will assess all your company's hazards and deficiencies. We will assess the risks associated with hazards, the people and/or the property at risk, the type of risk, and then implement suitable control measures for the management of the risks in an effective and in the most economical manner.

GAP ANALYSIS AND CAP AUDITING

This service is for companies which already have a safety system and want to measure the effectiveness of the system or trying to determine the gaps in the system. We have perfected gap analysis and CAP auditing techniques, and our qualified auditors will only measure the legality of your system but will also test the system for weakness. We will also provide a comprehensive report with solutions on how to repair your system.

FALL PROTECTION PLANS

Periculum recognises the fact that working at heights can be the greatest risk to any company. We, therefore, have a logical approach in keeping your employees safe while working in elevated positions. Our fall protection plans are developed by a competent fall protection developer, and by implementing our fall protection plan you can be assured that the risk for working at heights are mitigated. Our systems have been tested and trusted on projects including the tallest building in Africa.

TRAINING

At Periculum we recognise the importance of safety related training in the workplace. We therefore customised our training material to cover your system requirements. Our training consists out of the following.

1. Non-SETA accredited courses

Short courses designed to improve the competency of your legal appointed employees, Course material consists of the following aspects

- Legal liability for Management, Supervisors and Safety Representatives.
- Risk assessment training for Supervisors.
- Incident reporting and investigation for Supervisors, Safety officers and Safety representatives.
- System implementation training for safety officers, safety representatives and supervisors.
- Fall protection training to all employees working at heights.

2. SETA Accredited courses

We can arrange all SETA accredited courses from the best service providers in the industry at your workplace. We can also negotiate fair training prices from our network of service providers, which will not break your budget.

CONSTRUCTION MEDICALS

We have a vast network of service providers who can assist you with obtaining construction medicals. Our service providers are registered at all relevant authorities, and we can assist in negotiating the best prices in the market.

TETA/SETA REBATES

We can assist your company with the submission of your training claims, and with our expertise in skills development we can engage with TETA/SETA to discuss the best possible rebate to your company.

LETTER OF GOOD STANDING APPLICATIONS AND SUBMISSIONS

We can assist your company with the application process with the DOL/FEM for a letter of good standing. We can also audit your annual contributions, and assist with the resubmission process for annual renewal.

WCA CLAIMS

Periculum can assist your company with the dreadful compensation claims process, in the event of an injury/loss. We will engage directly with the service providers to obtain the outstanding documents, and ensure that your claims get settled in the fastest possible time.

INCIDENT/ACCIDENT INVESTIGATIONS

We can assist your company with a proper investigation of incidents using the Rcat system. Our investigators will ensure that the facts surrounding your incidents are thoroughly investigated.

GENERAL AUDITING

Periculum has a good understanding of all legal related matters in industry safety. Our audit systems is designed to audit any safety systems, and will focus only on the legal aspects applicable to your company.
